Professional Summary:

I'm a passionate and detail-oriented Frontend Developer with expertise in web technologies like HTML, CSS, JavaScript, and modern frameworks such as React. Eager to evolve into a full-stack developer, currently exploring the MERN (MongoDB, Express, React, Node.js) stack and React Native for mobile application development. Known for building responsive, user-friendly interfaces, improving user experiences, and delivering high-quality front-end solutions.

Driven by curiosity and a commitment to learning, actively expanding backend knowledge and full-stack development skills. Eager to transition into a versatile software developer with proficiency in both web and mobile app development, while staying current with industry trends and coding best practices.

Education:

Islamiah College, Vaniyambadi, Tamil Nadu
2nd Bachelor of Science, Computer Science

Grade: 8.6

Passing Year: 2026

Experience:

I have worked on several client projects, delivering customized solutions that meet specific business needs across different industries: **1.Web-Developer Intern at Cognifyz Technologies:** cognifyztechnology@gmail.com

2. Store Management System (Chemistry Department): Developed a system that allows students to take and return products, improving inventory management and resource tracking for the department.

3. Dawath Catering: Built a catering management system that streamlined client bookings, menu planning, and event management, enhancing service efficiency.

4. Inskart E-Commerce: Designed an e-commerce platform with product categories, payment gateways, and order tracking, helping the client expand their online business.

5. Billing System Software (IN Progress): Created software to automate invoicing, payment tracking, and financial reporting, improving the client's billing accuracy and cash flow management. These projects showcase my ability to deliver tailored software solutions and manage end-to-end client requirements effectively.

Skills:

Full Stack Developer | MERN Stack Developer | Full Stack engineer | Java | Spring boot | Docker | Kubernetes | Creating Engaging & Responsive User Interfaces | CorelDraw | Adobe Illustrator Sales Presentative Machine Learning & Mlops Enthusiast |

Real Time Projects:
